

Shark Marine Inc. Announces Integration Agreement with BlueView Technologies

Shark Marine of Ontario, Canada uses BlueView Technologies' line of miniature multibeam sonar in a new diver held navigation system.

St. Catharines, Ontario, December 18, 2006 – Shark Marine Inc. announced an agreement with BlueView Technologies Inc. to become a Value Added Reseller of BlueView's miniature multibeam sonar with Shark's second generation of self contained diver hand-held navigation systems. "In a situation with low or no visibility, reliable high-definition sonar technology is an essential tool to provide adequate underwater vision" said Jim Garrington,

President of Shark Marine Inc. "Until now, we were not able to offer our customers a high performance multibeam with our systems due to the typical large size, weight, and prohibitive price. The BlueView's combination of low-power draw, performance, and cost are unmatched in a multibeam package of this size."

The Navigator has numerous standard features including a Sharp 5" Daylight readable LCD screen, a surface and shallow water GPS navigation system and hot swappable wet pluggable battery packs. Multiple Wet Pluggable Data Ports present seemingly limitless expandability for a variety of accessories.

The compact BlueView P450 (450KHz) and P900 (900KHz) family of swappable plug and play multi-beam sonar is being used by key customers such as the US Navy, Port Authorities, Law Enforcement, Oil & Gas and Dive operations. The platform flexibility and ease of integration has been proven in a wide variety of applications including boat mounted, ROV, AUV/UUV and diver Hand held systems allowing users to accomplish previously difficult or impossible missions such as inspection, detection & interdiction, navigation and obstacle avoidance work.

About BlueView Technologies

Located in Seattle Washington, BlueView Technologies manufactures both custom and off-the-shelf miniature multibeam sonar solutions. BlueView provides mission-critical real-time underwater vision for Navy, Law Enforcement, Oil & Gas, and other marine applications. Visit BlueView online at www.blueviewtech.com.

About Shark Marine

Shark Marine is a manufacturer and supplier of ROV's, camera systems, oceanographic equipment and related services. As a developer and integrator of undersea technology, Shark Marine serves a wide range of customers that include gas and oil exploration, commercial diving, various governments, search and rescue, and survey firms. They offer a number of options for solving undersea problems and can provide custom solutions for even the most demanding underwater applications.
